PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
DO NOT contaminate streams, rivers or waterways with chemical or used containers.
Imidacloprid is toxic to certain aquatic species.
Application should be planned to avoid run-off within 48 hours of application.
DO NOT apply if heavy rains are expected to occur within 48 hours.
Irrigation within 48 hours of application should be minimal and sufficient to reduce seedling stress only.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to the spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS
Harmful if swallowed. Repeated exposure may cause allergic disorders. Wash hands after use. When preparing product for use, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and a face shield. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield and contaminated clothing.

FIRST AID
If poisoning occurs contact a doctor or Poisons Information Centre (Phone Australia: 131126).

MATERIAL SAFETY DATA SHEET
Additional information is listed in the Material Safety Data Sheet (MSDS) which is available from the supplier.

NOTICE TO BUYER
The use of CONFEDERATE 350SC Insecticide being beyond the control of the manufacturer, no warranty expressed or implied is given by Hextar Chemicals Pty. Ltd., regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not, and Hextar Chemicals Pty. Ltd. accepts no responsibility for any consequence whatsoever resulting from the use of this product.

This product is not considered to be a dangerous good under the Australian Code for the Transport of Dangerous Goods by Road and Rail.

In a transport emergency dial 000. Police or fire brigade.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
DO NOT contaminate streams, rivers or waterways with chemical or used containers. Imidacloprid is toxic to certain aquatic species. Application should be planned to avoid run-off within 48 hours of application.
DO NOT apply to wet/waterlogged soils.
DO NOT apply if heavy rains are expected to occur within 48 hours.
DO NOT apply to sugarcane within 48 hours of application.
DO NOT apply to vegetables within 48 hours of application.
DO NOT apply to wet/waterlogged soils.
DO NOT apply if heavy rains are expected to occur within 48 hours.

SUGAR CANE:
Irrigation should not occur within 48 hours of application.

VEGETABLES:
Irrigation within 48 hours of application should be minimal and sufficient to reduce seedling stress only.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling break, crush, or puncture and bury containers at a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS
Harmful if swallowed. Repeated exposure may cause allergic disorders. Wash hands after use. When preparing product for use, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and a face shield. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each day’s use, wash gloves, face shield and contaminated clothing.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

Imidacloprid is toxic to certain aquatic species.

Application should be planned to avoid run-off within 48 hours of application.

DO NOT apply to wet/waterlogged soils.

DO NOT apply if heavy rains are expected to occur within 48 hours.

Irrigation run-off from treated areas should be prevented from entering drains and waterways.

Sugar Cane: Irrigation should not occur within 48 hours of application.

Vegetables (furrow spray pre-plant and plant hole drench applications): Irrigation within 48 hours of application should be minimal and sufficient to reduce seedling stress only.

SAFETY DIRECTIONS

Harmful if swallowed. Repeated exposure may cause allergic disorders. Wash hands after use. When preparing product for use, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and a face shield. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield and contaminated clothing.
GENERAL INSTRUCTIONS

INSECTICIDE RESISTANCE WARNING

GROUP 4A INSECTICIDE

For insecticide resistance management, Confederate 350 SC Insecticide is a Group 4A insecticide. Some naturally occurring insect biopesticides are resistant to Group 4A Insecticides and other Group 4A Insecticides may shift through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Confederate 350 SC Insecticide and other Group 4A Insecticides are used repeatedly. The effectiveness of Confederate 350 SC Insecticide on resistant individuals could be significantly reduced.

Since the occurrence of resistant individuals is difficult to detect prior to use, Hestar Chemicals Pty Ltd accepts no liability for any losses that may result from the failure of Confederate 350 SC Insecticide to control resistant insects. Confederate 350 SC Insecticide may be subject to specific resistance management strategies. For further information contact your local supplier. Hestar Chemicals represents your local agricultural department/authority.

Resistance Management Strategy (vegetables): DO NOT apply Confederate 350 SC Insecticide more than once per season. DO NOT use Confederate 350 SC Insecticide or any Group 4A Insecticide more than once per spray application. WHERE APPLICABLE: Childers canegrub in sugarcane and Silverleaf whitefly in vegetables. Export of Treated Product: Growers should note that MRAs or import tolerances DO NOT exist in all markets for edible produce treated with Confederate 350 SC Insecticide. If you are growing edible produce for export please check with Hestar Chemicals for the latest information on MRAs and import tolerances before using Confederate 350 SC Insecticide.

DIRECTIONS FOR USE

RESTRANTS: DO NOT use on crops produced hydroponically or in glasshouses and other covered situations.

DO NOT apply Confederate 350 SC Insecticide or any other Group 4A Insecticide as a foliar spray after soil application of Confederate 350 SC Insecticide in that crop.

DO NOT apply more than one application of Confederate 350 SC Insecticide per crop for vegetables, per rotation crop for sugarcane.

**Table: Confederate 350 SC Insecticide**

<table>
<thead>
<tr>
<th>Crop</th>
<th>Pest</th>
<th>Rate</th>
<th>Critical Comments</th>
</tr>
</thead>
</table>
| Sugarcane (row crop only) | Greyback canegrub | 10-20 mL per 100 metres of cane row (equivalent to 0.50-1.44L/ha for single row cane with 1.52 m spacing between rows) | Apply from September to November to fields which are at high risk of Greyback grub damage. In areas of low risk, 50 mL of drench per 100 metres of cane row (equivalent to no less than 0.25 L/ha) is recommended. Apply after irrigation and before the start of fast growing stage. DO NOT apply Confederate 350 SC Insecticide more than once per season. Avoid applying more than 7 days from seed emergence if using a rotational crop. After irrigation, the grub damage may increase. The high rate of application must be used to avoid excessive damage. The high rate when grub populations are expected to be greater than 1.44 L/ha. Apply only as a subsurface soil application behind sowing (refer to Application instructions under GENERAL PROCEDURE). Soil should have moisture at suitable depth at the time of application or should receive at least 15 mm of rainfall or irrigation within 1 week. DO NOT use Confederate 350 SC Insecticide exposed to sunlight. After application the Confederate 350 SC Insecticide treated band is covered by at least 100 mm of soil and that the container sites are filled in completely. DO NOT apply Confederate 350 SC Insecticide in that crop.
| Sugarcane (row crop only) | Childers canegrub | 11-15 mL per 100 metres of cane row (equivalent to 0.50-1.44L/ha for single row cane with 1.52 m spacing between rows) | Apply from September to November. Check the presence of grubs from September onwards. Apply Confederate 350 SC Insecticide when grub numbers reach an economic threshold (about 3 grubs per stalk). Use the high rate when grub populations are expected to be greater than 1.44 L/ha. Apply only as a subsurface soil application. (Refer to Application instructions under GENERAL PROCEDURE). Soil should have moisture at suitable depth at the time of application or should receive at least 15 mm of rainfall or irrigation within 1 week. DO NOT leave Confederate 350 SC Insecticide exposed to sunlight. After application the Confederate 350 SC Insecticide treated band is covered by at least 100 mm of soil and that the container sites are filled in completely. DO NOT apply Confederate 350 SC Insecticide in that crop.
| Capsicum, Cucurbita, Eggplant, Sweet Potato, Tomatoes | Silverleaf whitefly including type B | 14 mL/100-metres of row | Sub-surface trickle irrigation injection: Apply once only 5-7 days after planting. Apply the injection site. Seedling irrigation or pre-emergent weed control is needed. DO NOT use Confederate 350 SC Insecticide exposed to sunlight. After application the Confederate 350 SC Insecticide treated band is covered by at least 100 mm of soil and that the container sites are filled in completely. DO NOT apply Confederate 350 SC Insecticide in that crop.
| Capsicum, Cucurbita, Eggplant, Sweet Potato, Tomatoes | 14 mL/100-metres of row | Sub-surface trickle irrigation injection: Apply once only 5-7 days after planting. Apply the injection site. Seedling irrigation or pre-emergent weed control is needed. DO NOT use Confederate 350 SC Insecticide exposed to sunlight. After application the Confederate 350 SC Insecticide treated band is covered by at least 100 mm of soil and that the container sites are filled in completely. DO NOT apply Confederate 350 SC Insecticide in that crop.
| Capsicum, Cucurbita, Eggplant, Sweet Potato, Tomatoes | 14 mL/100-metres of row | Fumigant pre-plant: Apply pre-plant to rows of plants. Apply a minimum of 7L of spray mixture per 100 m of row (equivalent to 0.39-1.08 L/ha for single row cane with 1.52 m spacing between rows) | Apply pre-plant to rows of plants. Apply a minimum of 7L of spray mixture per 100 m of row (equivalent to 0.39-1.08 L/ha for single row cane with 1.52 m spacing between rows) | Plant hole drench: Apply Confederate 350 SC Insecticide by this method where plant spacing along the row exceeds 60 cm. Apply the selected volume of drench mixture in the planting hole at least 22 mL per plant after planting. Steps to be taken to ensure workers DO NOT contact treated soil or drench mixture.

**NOT TO BE USED FOR ANY PURPOSE, DRIVE OR MANURE** CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIODS

Not required when used as directed.

Grayback canegrub

Twist coulter method: Apply sub-irrigation behind twin coulters to a depth of 100 mm. Coulters should be spaced 220 mm to 500 mm apart, one either side of the centre of the row. Coulters should be in the sides or top of the Stuart round rather than at the base. Narrow spacing may not be possible with advanced rotator growth. DO NOT apply using narrow spacing if rotator growth is advanced such that excessive crop damage from equipment may result. This method is not suitable for all areas. Before using this method consult your local Hestar Chemicals representative.

Childrens canegrub

Twist coulter method: Apply sub-irrigation behind twin coulters to a depth of 100 mm. Coulters should be spaced 220 mm to 350 mm apart, with one coulter on either side of the centre of the row.

**INSECTICIDE RESISTANCE WARNING**

DO NOT GRAZE OR CUT FOR STOCKFEED FOR 21 WEEKS AFTER APPLICATION.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT**

DO NOT contaminate streams, rivers or waterways with chemical or used containers.

Application should be planned to avoid runoff within 48 hours of application. DO NOT apply to wet, waterlogged soils. DO NOT allow to enter aquifer. DO NOT apply when heavy rain is expected or when irrigation is imminent after 21 weeks application. Application should be planned to avoid runoff within 48 hours of application. DO NOT apply to wet, waterlogged soils. DO NOT allow to enter aquifer. DO NOT apply when heavy rain is expected or when irrigation is imminent after 21 weeks application. Application should be planned to avoid runoff within 48 hours of application. DO NOT apply to wet, waterlogged soils. DO NOT allow to enter aquifer. DO NOT apply when heavy rain is expected or when irrigation is imminent after 21 weeks application.

**SAFETY DIRECTIONS**

Hazard: Must be followed. Repeated exposure may cause allergic reactions. Wash hands after use. When preparing product for use, wear cotton overalls buttoned to the buttons and a variety of short-sleeved shirt with long-sleeved nylon gloves and a face shield. After use and while eating, drinking or smoking wash hands, face and any contaminated clothing.

**FIRST AID**

For poisoning consult a doctor or Poisons Information Centre (Phone Australia: 131120)

**NOTICE TO BUYER**
