| FOR ANIMAL TREATMENT ONLY |
| Product name: | CLiK Plus Spray-On Off-Shears Blowfly and Lice Treatment |
| Active constituent/s: | Active Constituents: 50 g/L DICYCLANIL  
| 15 g/L DIFLUBENZURON |
| Statement of claims: | For sheep, treated off-shears or within 7 days after shearing and unshorn lambs up to 3 months of age.  
| Protects against fly strike (Lucilia cuprina) for 18 to 24 weeks, including those resistant to organophosphates and diflubenzuron.  
| Controls and treats diflubenzuron-susceptible body lice (Bovicola ovis), including lice resistant to synthetic pyrethroids.  
| Protects sheep against re-infestation with diflubenzuron-susceptible lice for 10 weeks after treatment. |
| Net contents: | 1, 2.5, 5, 20, 22 L |
| Directions for Use Heading: | DIRECTIONS FOR USE |
| Restraints: | Enter Restraints here |
| Contraindications: | CONTRAINDICATIONS  
| 1. This product must only be used on sheep off-shears or within 7 days after shearing and on unshorn lambs up to 3 months of age.  
| 2. DO NOT treat ewes for lice less than 4 weeks before lambing commences, as live lice can persist and infest the lambs.  
| 3. DO NOT mix treated sheep with untreated sheep until 4 weeks after treatment.  
| 4. DO NOT use on sheep which have not been cleanly shorn for any reason, eg. mycotic dermatitis.  
| 5. DO NOT dilute.  
| 6. DO NOT mix with any other product.  
| 7. DO NOT apply during gusty or windy weather as spray drift will reduce the period of protection. |

FOR THE PREVENTION OF BODY AND CRUTCH STRIKE, AND THE CONTROL AND TREATMENT OF BODY LICE

FOR THE PREVENTION OF POLL STRIKE

Rams and sheep susceptible to poll strike should be treated if also infested with lice. Apply an additional 5 mL of CLiK Plus Spray-On to the areas requiring protection, around the poll and horns.

FOR LICE CONTROL IN LAMMING EWE FLOCK

CLiK Plus Spray-On may be used to control diflubenzuron-susceptible lice in the following situations at the dose rates in the above table:

1. Ewes with lambs at foot (up to 3 months old). The ewes must be shorn and treated off-shears or within 7 days after shearing. If lambing has ceased, then unshorn lambs should be treated.

2. Pregnant ewes which have not yet started lambing. The ewes must be shorn and treated off-shears or within 7 days after shearing. Treat lambs (which are less than 3 months of age) born to treated ewes at a convenient time such as at lamb marking.

CRITICAL COMMENTS

1. Use CLiK Plus Spray-On for blowfly control only if sheep are also infested with diflubenzuron-susceptible lice. For prevention of fly-strike on lice-free sheep, use CLiK Spray-On.

2. Use only a spray-on applicator gun recommended by Novartis. DO NOT use a T-bar applicator.

3. Ensure the applicator gun is clean.

5. Treat the back and breach to protect against fly strike and control lice.

6. Apply two bands over the back. Apply the first band from between the ears to ~1/3rd of the way down the back. Provide good coverage of the neck and ensure the band width along the back is 15 - 20 cm. Then apply a second (slightly overlapping) 15 - 20 cm band down the remainder of the back, finishing...
just above the tail.

7. Apply a third 15 -20 cm band over the breech.

8. For lambs, <11kg, apply one band from between the ears to ~2/3rd of the way down the back. Then apply the second (slightly overlapping) band down the remainder of the back and over the breech.

9. This product is not recommended for treating existing fly strikes. Use a registered fly strike dressing for treating existing strikes.

10. Heavy rain following the application of this product could diminish the period of protection against fly strike.

11. Significant soiling with mud, dust, urine or faeces may reduce efficacy.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

General directions:

1. CLiK Plus Spray-On contains dicyclanil, an insect growth regulator (IGR) from the pyrimidinamine group and diflubenzuron, an IGR from the benzoyl phenyl urea group. CLiK Plus Spray-On does not kill adult flies or lice. However, both actives prevent juvenile insects developing into adults, thereby halting the insects’ life cycles.

2. The dose volume is determined by the weight of sheep being treated. Apply CLiK Plus Spray-On according to the diagram and table in the Directions for Use.

3. DO NOT DILUTE. Apply directly from the container using a spray-on applicator gun recommended by Novartis.

4. CLiK Plus Spray-On must be applied to sheep off-shears or within 7 days after shearing or to unshorn lambs up to 3 months of age to obtain protection against fly strike and control and treatment of body lice. It is important to lower the applicator gun when applying to the neck and then raise the gun to achieve a 15 - 20 cm wide band at each pass over the backline. Failure to evenly distribute the dose in this manner may result in poor louse and/or blowfly control.

Withholding Period/s:

MEAT: DO NOT USE less than 21 days before slaughter for human consumption.

MILK: DO NOT USE on lactating sheep producing milk or milk products that may be used for human consumption, or within 70 days of lambing,

WOOL HARVEST INTERVAL: DO NOT USE less than 6 months before shearing or fibre collection.

Trade Advice:

EXPORT SLAUGHTER INTERVAL (ESI): DO NOT USE less than 70 days before slaughter for export. The ESI on this label was correct at the time of label approval. Before using this product, confirm the current ESI from the manufacturer on 1800 633 768 or the APVMA website (www.apvma.gov.au/residues).

Use of this product may result in wool residues that may not comply with European Union environmental quality standards.

Wool treated with this product may contain detectable residues; adequate
treatment records should be kept and made available, if requested by wool
buyers.

Safety Directions:  
**SAFETY DIRECTIONS**  
May irritate the eyes and skin. Avoid contact with eyes and skin. When using
the product wear elbow-length rubber gloves. Wash hands after use.

First Aid:  
**FIRST AID**  
If poisoning occurs, contact a doctor or Poisons Information Centre (Phone 13
1126).

Additional user safety:  
Sheep Rehandling Interval: After treatment wait until sheep are dry before
rehandling.

Environmental statements:  
Protection of Wildlife, Fish, Crustacea and Environment  
Harmful to crustaceans and insects. Do not contaminate dams, waterways or
drains with the product or used containers. Do not discharge waste liquid into
streams.

Disposal:  
Disposal  
This container can be recycled if it is clean, dry, free of visible residues and has
the drumMUSTER logo visible. Triple or pressure rinse container for disposal. Dispose of rinsate or any undiluted chemical according to State legislative
requirements. Wash outside of the container and the cap. Store cleaned
container in a sheltered place with cap removed. It will then be acceptable for
recycling at any drumMUSTER collection or similar container management
program site. The cap should not be replaced but may be taken separately.

Storage:  
Storage  
Keep out of reach of children. Store below 30oC (Room Temperature). Protect
from frost. Store in original container tightly closed in a dry, cool place away
from food, drink, domestic items and animals. Do not store in direct sunlight.
Do not re-use the container.
